

UTE data format

Main Properties

Property	Unit	Description
vehicleID		unique vehicle identification
frame		frame id
laneID		the number of the lane in which the vehicle is located
time(s)	second	
lateralDistance(m)	meter	coordinates in the Frenet coordinate system. It means the distance between a car's center point and the lane centerline.
longitudinalDistance(m)	meter	coordinates in the Frenet coordinate system. It means the distance driving along the lane centerline.
speed(km/h)	km/h	
acceleration(m/s^2)	m/s^2	
vehicleLength(m)	meter	Length in pixel represents the raw size of the bounding box in the video.
vehicleWidth(*)	meter/pixel	Width in pixel represents the raw size of the bounding box in the video.

Special Properties in some datasets

Part of the following prepeties exist in the frenet.csv file.

Property	Unit	Description
leader_id		vehicleID of the leader in the same lane
follower_id		vehicleID of the follower in the same lane
leader_distance(m)	meter	the distance between the vehicle's center point to the leader's center point
follower_distance(m)	meter	the distance between the vehicle's center point to the follower's center point
distanceToUpperLaneLine(m)	meter	coordinates in the Frenet coordinate system. It means the distance between a car's center point and the upper lane(shown as the video or map).
distanceToLowerLaneLine(m)	meter	coordinates in the Frenet coordinate system. It means the distance between a car's center point and the lower lane(shown as the video or map).

Properties in pixel.csv in some datasets

If there is a file named pixel.csv exist in the dataset directory, part of the following prepeties exist in the pixel.csv file.

Property	Unit	Description
frame		frame id
time(s)		
vehicleID		unique vehicle identification
x	pixel	coordinates in pixel
y	pixel	coordinates in pixel
w	pixel	width of the bounding box
h	pixel	height of the bounding box
bb left	pixel	left location of the bounding box
bb top	pixel	top location of the bounding box
bb width	pixel	width of the bounding box
bb height	pixel	height of the bounding box
class		the class of the object
